## **T AND OTHER CATASTROPHES**

### **The Surprising Science of Sex and Society**

Cordelia Fine

(W. W. Norton, 2015)

Evolutionary Psychology has long held that “our modern skulls house a Stone Age mind”. In **T AND OTHER CATASTROPHES**, Cordelia Fine shows that in fact we have evolved to be adaptive to local social conditions – to be ‘wired for culture’ – giving us the incredible capacity for behavioral diversity and flexibility in order to flourish in a bewildering variety of social and physical settings.

Recent studies have shown that the functional and even structural organization of the human brain is a continuous and dynamic process that continues throughout life. An increasingly large body of research has demonstrated the power of an individual's behavior, the behavior of others, and the social environment to influence brain and behavior by changing the endocrine system itself. As a result, **hormones like testosterone – once thought of as the biological essence of a universal and timeless masculinity – have instead come to be seen as absolutely key in enabling behavior to change in response to the environment, both in the short- and long-term.**

**T AND OTHER CATASTROPHES** applies the new scientific understandings of the brain, hormones and evolution to the gender debate, and shows how viewing the topic through the lens of contemporary scientific models transforms us, and erodes the false boundary between ‘nature’ and ‘nurture’.

#### **PRAISE FOR DELUSIONS OF GENDER:**

“Whether or not you believed in hard-wired gender differences before reading the book, it would be difficult to complete it without feeling at least a healthy skepticism about the role of biology in the way our lives play out. ...A forceful, funny new book.”

- **Boston Globe**

“I am so glad that someone has tackled all the new reports of hard-wired sex differences that continue to come out.”

- Professor **Anne Fausto-Sterling**, author of *Myths of Gender*

## DELUSIONS OF GENDER: How Our Minds, Society and Neurosexism Create Difference

Cordelia Fine  
(Norton)

**DELUSIONS OF GENDER** has been called a “fabulous combination of wit, passion and scholarship...This marvelous and important book will change the way readers view the gendered world” (**starred Publisher’s Weekly**), “an admirably fluent review of a gazillion brain-science studies” (**ELLE**), and “Like Robert Wright (The Moral Animal), Fine’s greatest strength is her accessible voice and clear structure” (**Kirkus**).

“...it’s not too late to read this book and see how complex and fascinating the whole issue is. It’s really not just a few steps from looking longer at moving objects to aptitude in math, from gazing at faces to mind reading.”

– **New York Times**

“Whether or not you believed in hard-wired gender differences before reading the book, it would be difficult to complete it without feeling at least a healthy skepticism about the role of biology in the way our lives play out. ...A forceful, funny new book.”

- **Boston Globe**

“So you thought sexism was a thing of the past? A growing number believe there’s an ‘immutable’ biological difference between the male and female brain. But brain differences are no explanations for why so few women are engineers and so few men go into nursing. Packed with rich, scientific detail, Fine’s argument is solid.”

- **Newsweek**

“I am so glad that someone has tackled all the new reports of hard-wired sex differences that continue to come out.”

– Professor **Anne Fausto-Sterling**, author of *Myths of Gender*

---

“...passionate, insightful and funny...gender identity is all in the mind, not the brain; in the software, not the hardware...”

**Globe & Mail**

---

---

“Fine debunks the myth that men’s and women’s brains are hardwired differently.”

## THE POPE'S JEWS

### The Vatican's Secret Plan to Save Jews from the Nazis

Gordon Thomas  
(St. Martin's Press)

This revelatory account of how the Vatican saved thousands of Jews during WWII shows why history must exonerate "Hitler's Pope"

Accused of being "silent" during the Holocaust, Pope Pius XII and the Vatican of World War II are now exonerated in Gordon Thomas's newest investigative work. Thomas's careful research into new, first-hand accounts reveal an underground network of priests, nuns and citizens that risked their lives daily to protect Roman Jews.

Investigating assassination plots, conspiracies, and secret conversions, Thomas unveils faked documentation, quarantines, and more extraordinary actions taken by Catholics and the Vatican. *The Pope's Jews* finally answers the great moral question of the War: Why did Pope Pius XII refuse to condemn the genocide of Europe's Jews?

With the determination of a great investigator, he provides accounts that were previously unknown, and with the writing skills of a best-selling author, he breathes life into the story of Pope Pius XII and the Jews of World War II. *The Pope's Jews* is a riveting account of an immensely important but often misunderstood slice of history."

## **The Science of Sin: The Psychology of the Seven Deadly Sins (And Why They Are So Good for You)**

Simon Laham  
(Three Rivers Press [Crown])

Award-winning social psychologist Simon Laham uses Modern psychological science and historical anecdotes to contend that the “seven deadly sins” not only feel good, but are good for you. From gluttony to greed, to envy and lust, even the deadliest of sins can make you smart, successful and happy. Based on many studies, Dr. Laham eloquently tells us why the greedy are happy, the slothful are smart, gluttons are social butterflies and how anger can make you a fearsome negotiator.

Laham has published numerous peer reviewed scholarly articles on the psychology of morality and emotion, which have appeared in leading journals. He is coeditor of *Social Motivation: Conscious and Unconscious Processes*, published by Cambridge University Press.

“Social psychologist Laham suggests the seven deadly sins can have positive value [and] opposes the “simplistic labeling” of [sins] as “uniformly wrong” [in this] lighthearted foray into motivational research”
