How Big Is Baby Now?

Maryann Cocca-Leffler

This unique die-cut board book is the perfect gift for kids wondering what's going on inside Mom's pregnant belly.

- **Unique book children will love: While it's common in books for parents, no other children's book correlates belly size to tangible objects in this way**
- **Relatable and useful: References to common objects help children understand the size of the baby growing inside of Mom's ever-expanding tummy. Numbers indicate pregnancy months, and act as number concept for young readers.**

Mommy's belly is growing. There's a baby inside! How big is baby now? Starting with three months, we can count the months and compare the little baby growing inside Mommy's belly to things that young children can relate to and see around them: from an egg to a football to a gallon of milk, children can count along and feel like they're a part of the magic that is happening inside that belly! There is currently no other book like this on the market, even though we all know young kids are fascinated with what's going on "in there" when they see pregnant bellies! This is sure to be the perfect gift for expecting moms and a potential classic for many years to come.

The Star Shepherd

Dan Haring, MarcyKate Connolly

The stars keep the world safe from evil creatures, but when they start falling, it's up to Kyro to save the day in this beautifully illustrated middle-grade novel

- **Author to build:** MarcyKate Connolly's *Shadow Weaver* was an Indie Next pick, a Junior Library Guild selection, and it received two starred reviews
- **Beautiful illustrations:** Each chapter will have a full-page illustration and spot art throughout, making this perfect for middle-grade readers
- **Wonderful writing:** Engaging writing and strong worldbuilding make for a perfect addition to the category where it will fit both with Neil Gaiman and *How to Train Your Dragon*

When the world first formed, the night was black and filled with dark creatures. The Elders knew their people couldn't survive under such a threat. So they made the ultimate sacrifice: they gave their hearts to the sky in the form of brightly shining stars to keep evil underground.

Now, eleven-year-old Kyro is a Star Shepherd like his father. He's spent his life tucked away in the outskirts of the small town of Drenn. There they watch the night sky for falling stars—and rush to rescue them when they do.

Then on night, too many stars fall at once, and Kyro's father journeys to the Star Shepherd Council to report the threat. But when he doesn't return Kyro must figure out how to save them himself before enough stars fall for the dark creatures to make their return.

DAN HARING is a visual effects and animation artist, who has worked on films such as *Tangled*, *The Lion King 3D*, *Incredible Hulk* and *Rio 2*. He lives in Utah with his awesome wife and kids.

After Zero
Christina Collins

- **A poignant and lyrical middle-grade debut that asks: What do you do when you realize that words can be more isolating than silence?**

CHRISTINA COLLINS is an American currently studying for her PhD in creative writing in Belfast. Her work has appeared in over a dozen publications. She holds an MFA in fiction from George Mason University, where she received full funding and an Honours Award.

Elise keeps a notebook full of tallies, each stroke marking a word spoken. A word that can't be taken back. Five tallies is not so bad. Two is pretty good. But zero is perfect. Zero means no wrong answers in class, no secrets spilled, no conversations to agonize over at night. But now months have passed, and Elise isn't sure she could speak even if she wanted to. Not to keep her only friend, Mel, from drifting further away, or to ask if anyone else has seen her teacher's stuffed raven come to life. Then, a shocking family secret helps Elise realize that her silence might just be the key to unlocking everything she's ever hoped for...
