THE RETURN

by NICHOLAS SPARKS

In the romantic tradition of *Dear John*, #1 New York Times bestselling author Nicholas Sparks returns with the story of an injured Navy doctor and a beautiful deputy, whose secrets will change the course of his life.

Trevor Benson never intended to move back to New Bern, NC. But when a mortar blast outside the hospital where he worked as an orthopedic surgeon sent him home from Afghanistan with devastating injuries, the dilapidated cabin he inherited from his grandfather seemed as good a place to regroup as any.

Tending to his grandfather's beloved beehives while gearing up for a second stint in medical school, Trevor isn't prepared to fall in love with a local . . . and yet, from their very first encounter, his connection with Natalie Masterson can't be ignored. But even as she seems to reciprocate his feelings, she remains frustratingly distant, making Trevor wonder what she's hiding.

Further complicating his stay in New Bern is the presence of a sullen teenage girl, Callie, who lives in the trailer park down the road from his grandfather's cabin. Claiming to be 19, she works at the local sundries store and keeps to herself. When he discovers she was once befriended by his grandfather, Trevor hopes Callie can shed light on the mysterious circumstances of his grandfather's death, but she offers few clues -- until a crisis triggers a race that will uncover the true nature of Callie's past, one more intertwined with the elderly man's passing than Trevor could ever have anticipated.

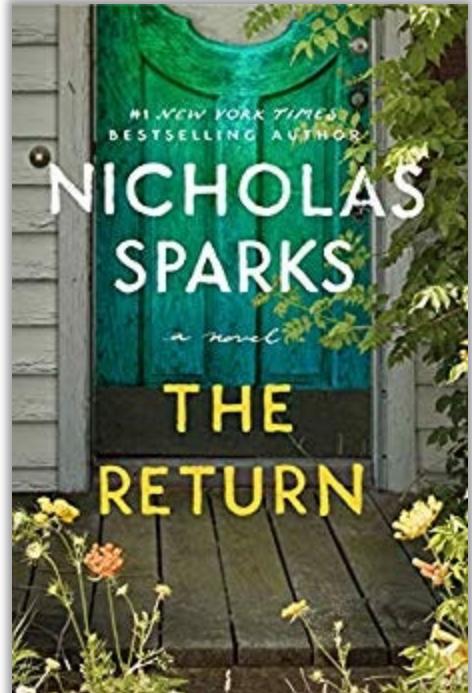

In his quest to unravel Natalie and Callie's secrets, Trevor will learn the true meaning of love and forgiveness . . . and that in life, to move forward, we must often return to the place where it all began.

IF I HAD YOUR FACE

by FRANCES CHA

In this riveting debut novel set in contemporary Seoul, four young women make their way in a world defined by impossibly high standards of beauty, secret room salons catering to wealthy men, strict social hierarchies, and K-pop fan mania.

Kyuri is a heartbreakingly beautiful woman with a hard-won job at a "room salon," an exclusive bar where she entertains businessmen while they drink. Though she prides herself on her cold, clear-eyed approach to life, an impulsive mistake with a client may come to threaten her livelihood. Her roommate, Miho, is a talented artist who grew up in an orphanage but won a scholarship to study art in New York. Returning to Korea after college, she finds herself in a precarious relationship with the super-wealthy heir to one of Korea's biggest companies.

Down the hall in their apartment building lives Ara, a hair stylist for whom two preoccupations sustain her: obsession with a boy-band pop star, and a best friend who is saving up for the extreme plastic surgery that is commonplace. And Wonna, one floor below, is a newlywed trying to get pregnant with a child that she and her husband have no idea how they can afford to raise and educate in the cutthroat economy.

Together, their stories tell a gripping tale that's seemingly unfamiliar, yet unmistakably universal in the way that their tentative friendships may be their saving grace.

THE LIES THAT BIND

by EMILY GIFFIN

In the irresistible new novel from the #1 *New York Times* bestselling author of *All We Ever Wanted* and *Something Borrowed*, a young woman falls hard for an impossibly perfect man before he disappears without a trace. . . .

It's 2 A.M. on a Saturday night in the spring of 2001, and twenty-eight-year-old Cecily Gardner sits alone in a dive bar in New York's East Village, questioning her life. Feeling lonesome and homesick for the Midwest, she wonders if she'll ever make it as a reporter in the big city—and whether she made a terrible mistake in breaking up with her longtime boyfriend, Matthew.

As Cecily reaches for the phone to call him, she hears a guy on the barstool next to her say, "Don't do it—you'll regret it." Something tells her to listen, and over the next several hours—and shots of tequila—the two forge an unlikely connection. That should be it, they both decide the next morning, as Cecily reminds herself of the perils of a rebound relationship. Moreover, their timing couldn't be worse—Grant is preparing to quit his job and move overseas. Yet despite all their obstacles, they can't seem to say goodbye, and for the first time in her carefully constructed life, Cecily follows her heart instead of her head.

Then Grant disappears in the chaos of 9/11. Fearing the worst, Cecily spots his face on a missing-person poster, and realizes she is not the only one searching for him. Her investigative reporting instincts kick into action as she vows to discover the truth. But the questions pile up fast: How well did she really know Grant? Did he ever really love her? And is it possible to love a man who wasn't who he seemed to be?

THE LIES THAT BIND is a mesmerizing and emotionally resonant exploration of the never-ending search for love and truth—in our relationships, our careers, and deep within our own hearts.

THE FIRE IN HIS WAKE

by SPENCER WOLFF

Spencer Wolff's debut novel **THE FIRE IN HIS WAKE** tells the parallel stories of an African refugee and a hapless UN worker in Morocco, spinning a fine web of modern trauma and hope.

THE FIRE IN HIS WAKE recounts the journey of Arès Sbigzenou, a Congolese refugee left for dead in the wake of ethnic violence. Arès' fate, like the fate of millions, sends him on a kinetic flight across northern Africa with Europe as his goal. He reaches Rabat, Morocco, where he binds himself to a desperate community of exiles, and meets Simon, a young UN worker, whose journey is altogether different but no less fraught.

While Arès struggles to rebuild his life and come to terms with his past, Simon grapples with the moral compromises inherent in his profession and position. Part sweeping portrait of life in the Maghreb, part epic tale of hope and perseverance, **THE FIRE IN HIS WAKE** carries the reader from the administrative reckonings of the UN staff to the daily hazards faced by the refugees in the streets and on their risky crossings to Europe. When a storm gathers at the UNHCR, and the ghosts of the Congo's violence unexpectedly surface in Rabat, the two men find themselves on a collision course, setting the stage for the novel's unforgettable and genre-busting ending.

NEW TAYLOR JENKINS REID NOVEL

MALIBU BURNING

Coming March 2021

DAISY JONES & THE SIX by TAYLOR JENKINS REID

A gripping novel about the whirlwind rise of an iconic 1970s rock group and their beautiful lead singer, revealing the mystery behind their infamous breakup.

Everyone knows Daisy Jones & the Six, but nobody knows the reason behind their split at the absolute height of their popularity . . . until now.

Daisy came of age in LA in the late sixties, sneaking into clubs on the Sunset Strip, sleeping with rock stars, and dreaming of singing at the Whisky a Go Go. The sex and drugs were thrilling, but it was the rock'n'roll she loved the most. By the time she'd turned twenty, her voice was getting noticed, and she had the kind of heedless beauty that made people do crazy things. The Six, led by the brooding Billy Dunne, was also rising through the ranks of the LA music scene. On the eve of their first tour, Billy's girlfriend becomes pregnant, prompting him to go a little wild on the road under the pressure of impending fatherhood and fame. Daisy and Billy crossed paths when a producer realized the key to supercharged success was to put the two together. What happened next became the stuff of legend.

The making of that legend is chronicled in this riveting and unforgettable novel, written as an oral history of one of the biggest bands of the seventies. Brilliantly capturing a place and time in an utterly distinctive voice, Taylor Jenkins Reid takes her work to a new level with DAISY JONES AND THE SIX.

Praise for DAISY JONES AND THE SIX:

"Reid delivers a stunning story of sex, drugs, and rock 'n' roll in the 1960s and '70s in this expertly wrought novel. . . . Reid creates both story line and character gold. The book's prose is propulsive, original, and often raw. . . . Reid's gift for creating imperfect characters and taut plots courses throughout this addictive novel." —*Publishers Weekly*, starred review ★

ROAR by CECELIA AHERN

A Story for Every Woman.

In this singular and imaginative story collection, Cecelia Ahern illuminates the myriad ways in which women overcome adversity with wit, resourcefulness and compassion. Exploring dilemmas and aspirations that women everywhere will relate to, these unforgettable tales blend magical realism and familiar scenarios with startling and often hilarious results. In matters ranging from marriage and childrearing to politics and careers, the heroines of these thought-provoking stories confront problems both mysterious and mundane: one woman is tortured by sinister bite marks that appear on her skin; another is swallowed up by the floor during a mortifying presentation; yet another resolves to return and exchange her boring husband at the store where she originally acquired him. As they wrestle with obstacles of all kinds, their reality is shaped by how others perceive them—and ultimately, how they perceive the power within themselves.

By turns sly, whimsical and affecting, these thirty short stories are an inspiring examination of what it means to be a woman today.

THE LONELY HEART OF MAYBELLE LANE

by KATE O'SHAUGHNESSY

Maybelle Lane is looking for her father, but on the road to Nashville she finds so much more: courage, brains, heart—and true friends.

Eleven-year-old Maybelle Lane collects sounds. She records the Louisiana crickets chirping, Momma strumming her guitar, their broken trailer door squeaking. But the crown jewel of her collection is a sound she didn't collect herself: an old recording of her daddy's warm-sunshine laugh, saved on an old phone's voicemail. It's the only thing she has of his, and the only thing she knows about him.

Until the day she hears that laugh—*his* laugh—pouring out of the car radio. Going against Momma's wishes, Maybelle starts listening to her radio DJ daddy's new show, drinking in every word like a plant leaning toward the sun. When he announces he'll be the judge of a singing contest in Nashville, she signs up. What better way to meet than to stand before him and sing with all her heart?

But the road to Nashville is bumpy. Her starch-stiff neighbor Mrs. Boggs offers to drive her in her RV. And a bully of a boy from the trailer park hitches a ride, too. These are not the people May would have chosen to help her, but it turns out they're searching for things as well. And the journey will mold them into the best kind of family--the kind you choose for yourself.

Advance praise for **THE LONELY HEART OF MAYBELLE LANE**:

"A rich and rewarding debut." —*Kirkus Reviews*, starred review ★

Some students rally to their cause...but others are aggrieved to watch their own plans fall apart.

Amira has trained all year to compete in the school decathlon on her own terms. Peejay intended to honor his brother by throwing the greatest party CIS has ever seen. Kenji was looking forward to making a splash at his improv showcase. Omar wanted to spend a little time with the boy he's been crushing on. Celeste, adrift in a new country, was hoping to connect with someone—anyone. And Marisa, once so certain of her goals, must now decide how far she'll go to attain them.

Every year, lock-in night changes lives. This year, it might just change the world.

Praise for WE DIDN'T ASK FOR THIS:

"Packed with quips and insights, the wry narrative captures the intense yearnings of young adulthood; the ridiculous spectrum of clueless, controlling, and (sometimes) cooperative adults; and the overwhelming inertia of institutions . . . A droll, engrossing exploration of privileged teens striving to do better." —*Kirkus Reviews*, starred review ★

"In a timely novel featuring a large cast from around the globe, Alsaid (*Brief Chronicle of Another Stupid Heartbreak*) underlines ecological issues while showing the positive impact of creative problem solving and collaboration."

—*Publishers Weekly*, starred review ★

"The novel progresses with a light-hearted tone at a rapid pace, deftly exploring timely issues such as ecology and preservation, and Alsaid weaves in discussions about all forms of identity—nationality, race, religion, language, gender, sexual orientation...expertly blurs the line between right and wrong."

—*Booklist*

Praise for prior book, NEVER ALWAYS SOMETIMES:

"There is a kernel of truth in every cliché, and Alsaid cracks the teen-lit trope of friends becoming lovers wide open, exposing a beautiful truth inside. He also perfectly captures the golden glow of senioritis, a period when teens are bored and excited and wistful and nostalgic all at once. Everything is possible in this handful of weeks, including making up for squandered time."

SPLINTERS OF SCARLET

by EMILY BAIN MURPHY

Enchantée meets Downton Abbey in this atmospheric YA historical fantasy set in nineteenth-century Denmark, where secrets can kill and magic is a deadly gift.

For Marit Olsen, magic is all about strategy: it flows freely through her blood, but every use leaves behind a deadly, ice-like build-up within her veins called the Firn. Marit knows how dangerous it is to let too much Firn build up—after all, it killed her sister—and she has vowed never to use her thread magic. But when Eve, a fellow orphan whom Marit views like a little sister, is adopted by the wealthy Helene Vestergaard, Marit will do anything to stay by Eve's side. She decides to risk the Firn and uses magic to secure a job as a seamstress in the Vestergaard household.

But Marit has a second, hidden agenda: her father died while working in the Vestergaards' jewel mines—and it might not have been an accident. The closer Marit gets to the truth about the Vestergaard family, the more she realizes she and everyone she's come to love are in danger. When she finds herself in the middle of a treacherous deception that goes all the way up to the king of Denmark, magic may be the only thing that can save her—if it doesn't kill her first.

DIAMOND CITY is an action-packed young adult fantasy by debut author Francesca Flores about a girl who perseveres through poverty, violence, and loss to achieve a future for herself.

Good things don't happen to girls who come from nothing...unless they risk everything.

Meet Aina Solís. Pulled off the streets when she was twelve years old, Aina was trained to become one of the most powerful and dangerous assassins in Sumerand, a kingdom founded by immigrants, built by magic, and still reeling from an industrial revolution that's led to all-out civil war. Fearless and willing to risk everything—and with nothing left to lose—Aina is ready to leave her wretched past behind and accept a once-in-a-lifetime opportunity: to kill a wealthy industrialist named Kouta. But this career-defining move won't come easy. She will have to act against her boss Kohl, who doesn't tolerate his assassins working against him. What will be the price for her betrayal? Meanwhile, the closer Aina gets to her target, the more she craves an answer to the questions an assassin is never meant to ask: Who wants Kouta dead? And why was Aina chosen for this mission?

Now, in a city full of dark forces and hidden agendas, old rivalries and a whole new world of enemies, it's up to Aina to unravel a conspiracy that could rewrite Sumerand's history and her own future. THE LAST TRUE POETS OF THE SEA

by JULIA DRAKE

From a stunning new voice in YA literature comes an epic, utterly unforgettable contemporary novel about a lost shipwreck, a missing piece of family history, and weathering the storms of life.

The Larkin family isn't just lucky—they persevere. At least that's what Violet and her younger brother, Sam, were always told. When the *Lyric* sank off the coast of Maine, their great-great-great-grandmother didn't drown like the rest of the passengers. No, Fidelia swam to shore, fell in love, and founded Lyric, Maine, the town Violet and Sam returned to every summer. But wrecks seem to run in the family: Tall, funny, musical Violet can't stop partying with the wrong people. And, one beautiful summer day, brilliant, sensitive Sam attempts to take his own life.

Shipped back to Lyric while Sam is in treatment, Violet is haunted by her family's missing piece—the lost shipwreck she and Sam dreamed of discovering when they were children. Desperate to make amends, Violet embarks on a wildly ambitious mission: locate the *Lyric*, lain hidden in a watery grave for over a century. She finds a fellow wreck hunter in Liv Stone, an amateur local historian whose sparkling intelligence and guarded gray eyes make Violet ache in an exhilarating new way. Whether or not they find the *Lyric*, the journey Violet takes—and the bridges she builds along the way—may be the start of something like survival.

Epic, funny, and sweepingly romantic, **THE LAST TRUE POETS OF THE SEA** is an astonishing debut about the strength it takes to swim up from a wreck.

Over the past few years, however, the concern that their undocumented immigrant parents could be sent back to Mexico has started to fade to the back of their minds. And why wouldn't it, when their Ma and Pa have been in the United States for so long, they have American-born children, and they've built a life for themselves here?

But when two ICE agents come looking for Pa, the Garcia family realizes that the lives they've built could well come crumbling down. Then, Mateo returns from school one day to find that their worst nightmare realized: his parents have been detained.

With his Ma and Pa being held in separate detention centers, Mateo must step-up and learn how to look after his sister and himself. The choices Mateo makes, and the people he turns to for help, might reunite his family...or tear them apart for good. With his parents' fate and his own future hanging in the balance, Mateo must figure out who he is and what he is capable of, even as he's forced to question what it means to be an American teenager in a country that rejects his own mom and dad.

THE IMPOSSIBLE FIRST:

From Fire to Ice—Crossing Antarctica Alone

by COLIN O'BRADY

Colin O’Brady’s awe-inspiring memoir recounts his triumphant recovery from a tragic accident and his gripping 932-mile crossing of the landmass of Antarctica solo, unsupported, and human powered—the first to accomplish this extraordinary feat.

Prior to December 2018, no individual had ever crossed the landmass of Antarctica alone and without any outside assistance. Yet Colin O’Brady was determined to do just that, even if, upon taking the first steps of what was to be a nearly two-month journey, he had his doubts. His challenge was made even more intense by a head-to-head battle that emerged with British polar adventurer Captain Louis Rudd—also striving to be “the first.” On skis, pulling a sled that at first weighed 375 pounds, in complete isolation and through a succession of whiteouts, storms, and a series of near disasters—O’Brady persevered. Somewhere in the vast white landscape was Rudd.

THE IMPOSSIBLE FIRST is the story of O’Brady’s spectacular, record-breaking journey across the continent and it is the story of the journey that led him to this endeavor. After a burn accident in his early twenties, he was told he might never walk again. From the depths of that crisis, he fought his way back and went on to set three mountaineering world records. With Everest and the tallest peaks on each continent already conquered, he felt driven to further explore his potential, which now brought him to this historic Antarctic challenge. His triumph over adversity and his stunning dedication have inspired millions.

Set against the backdrop of one of the most extreme environments on earth, **THE IMPOSSIBLE FIRST** reveals how anyone can reject limits, overcome immense obstacles, and discover what matters most.

- A *New York Times* bestseller!

Praise for **THE IMPOSSIBLE FIRST**:

“Harrowing... an unforgettable memoir of perseverance, survival, daring to dream big, and showing the world how to make the impossible possible.”

-Booklist, starred review ★

“O’Brady is a confident, crafty storyteller...This inner saga works hand in hand with the physical challenges to make for a full tapestry of remarkable experience. A brutally sublime tale of derring-do that transports as well as teaches.”

-Kirkus Reviews

“A page-turning story of adventure that goes so much deeper. . . Anyone looking for a story of both grit and love will find it here.”

-Rachel Hollis, author of *Girl, Wash Your Face*

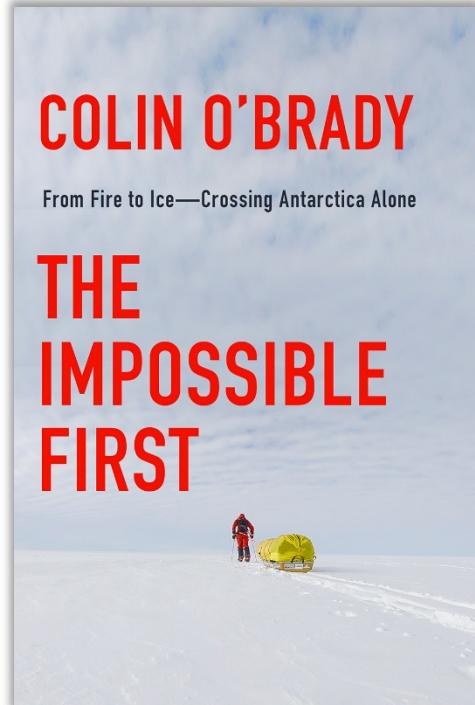

“**THE IMPOSSIBLE FIRST** is a uniquely perceptive, first-person account of how an ordinary person, when loved and supported, can accomplish the extraordinary. A jaw-dropping tale of passion and perseverance, it will have you furiously turning pages to see not just what will happen to Colin, the athlete who tests physical limits, but Colin, the man driven to find his best self. If your dreams sometimes seem beset by doubts in equal measure, read this book. It will tip the balance.”

-Angela Duckworth, author of the #1 *New York Times* bestseller *Grit*

“Colin O’Brady’s amazing adventure is well-written and a fast read. But hang on to it after you finish. On down days go back to the book. It will pick up your spirits dramatically.”

-Phil Knight, founder of Nike, Inc., and author of *Shoe Dog*

Colin O’Brady is an American professional endurance athlete, motivational speaker and adventurer. O’Brady is a four-time world record holder and holds speed records for the Explorers Grand Slam and Seven Summits. THE END OF FOOD ALLERGY:

The First Program to Prevent and Reverse a 21st Century Epidemic

by DR. KARI NADEAU AND SLOAN BARNETT

A life-changing, research-based program that will end food allergies in children and adults forever.

The problem of food allergy is exploding around us. But this book offers the first glimpse of hope with a powerful message: You can work with your family and your doctor to eliminate your food allergy forever.

The trailblazing research of Stanford University's Dr. Kari Nadeau reveals that food allergy is not a life sentence, because the immune system can be retrained. Food allergies—from mild hives to life-threatening airway constriction—can be disrupted, slowed, and stopped. The key is a strategy called immunotherapy (IT)—the controlled, gradual reintroduction of an allergen into the body. With innovations that include state-of-the-art therapies targeting specific components of the immune system, Dr. Nadeau and her team have increased the speed and effectiveness of this treatment to a matter of months.

New York Times bestselling author Sloan Barnett, the mother of two children with food allergies, provides a lay perspective that helps make Dr. Nadeau's research accessible for everyone. Together, they walk readers through every aspect of food allergy, including how to find the right treatment and how to manage the ongoing fear of allergens that haunts so many sufferers, to give us a clear, supportive plan to combat a major national and global health issue.

THE GREAT INDOORS:

An Inside Journey into How Buildings Shape Our Lives

by EMILY ANTHES

A fascinating, thought-provoking journey into our human-made built environment.

The benefits of nature are well documented. Regular forays into the natural world have been shown to have pronounced, positive effects on our physical and mental health. But how often do any of us get to take a week-long camping trip?

The truth is, we spend most of our lives shuttling between homes, schools, offices, and hospitals. While this may be an inescapable part of modern life, it also raises the question: What effect do the environments we've built for ourselves have on our mental and physical well-being? In this wide-ranging, character-driven book, Emily Anthes takes us on a trip that starts with the microscopic (the surprising array of microbes that share our homes) and ends with the big picture (the Martian architecture that could help humanity survive for many centuries to come). Along the way, she visits a wide range of scientists, architects, and other professionals working on the cutting edge of design—people who are not only aware of how our surroundings shape us, but are working to create buildings that can radically improve our lives.

Ranging from operating rooms that decrease human error to schools constructed to enhance learning, and from apartment buildings designed for neurodiverse residents to offices engineered for maximum comfort and efficiency, **THE GREAT INDOORS** is an argument for thoughtful interventions in the built environment and a celebration of the adaptive genius of human beings.

Praise for THE GREAT INDOORS:

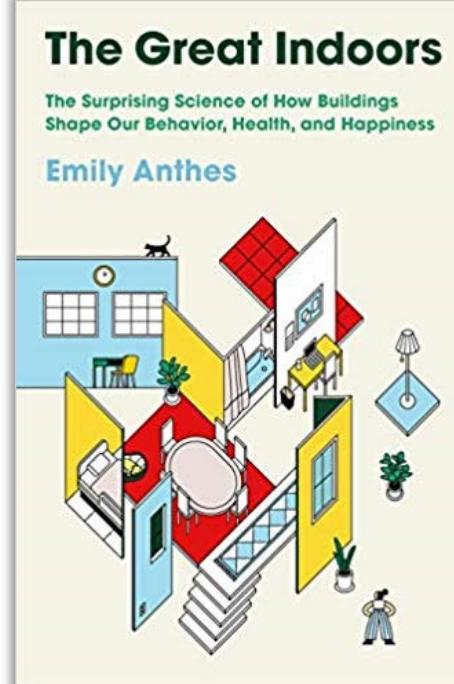

"A trip into **THE GREAT INDOORS** with Emily Anthes is a journey into fascination, dismay, and the occasional jolt of pure wonder."

-Deborah Blum, author of *The Poison Squad*

"**THE GREAT INDOORS** is that rare book that remains both honest and optimistic about the problems we face, from pandemic disease to social isolation, and—even better—is ambitious enough to identify real potential for change surrounding us in the architecture of our daily lives. Inspiring."

CHANGE:

The Surprising Science of How New Ideas and Behaviors Take Off and Take Hold by DAMON CENTOLA

A scientific exploration of how beliefs, behaviors, and ideas spread through social networks for a popular audience.

A big think book that will delight fans of Malcolm Gladwell, Chip and Dan Heath, and Richard Thaler and Cass Sunstein's NUDGE.

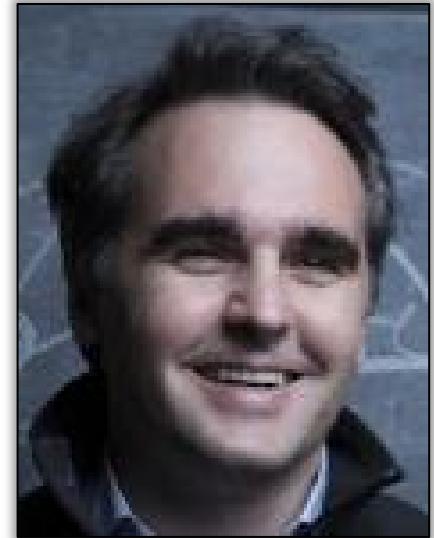

Most of what we know about how ideas spread comes from bestselling authors who give us a compelling picture of a world, in which "influencers" are king, "sticky" ideas "go viral," and good behavior is "nudged" forward. The only problem is that the world they describe is a world where information spreads, but beliefs and behaviors stay the same. It is a world of *simple contagions*, which spread quickly to everyone, but do not have any lasting impact on what we think or how we live.

Since Damon first developed his theory of complex contagions in 2007, it has been applied to everything from the unexpected growth of Arab Spring, to changes in coaching strategy in the NFL, to the rapid rise of the #MeToo movement, to the worldwide spread of Skype and Facebook. This book is the crystallization of fifteen years of groundbreaking research on social networks and behavior change, published in the world's leading scientific journals, awarded top prizes for theoretical discovery and methodological innovation, and patented by Harvard University.

Damon's book will start by busting myths and common mistakes re: the ways new ideas spread, but it will focus on solutions. It is about the spread of innovations, the dispersion of ideas, the adoption of inventions, the growth of social movements, the success of political campaigns, and the uptake of new health behaviors. With clear language, using high-profile examples drawn from business, sports, health, lifestyle, and politics, Damon is excited to change how popular readers see how new behaviors, beliefs, and ideas spread in the world they live in.

- Sold in a seven-figure pre-empt to Tracy Behar

Damon Centola is an acclaimed thought leader, who is credited with developing the theory of complex contagions that has forever altered our scientific understanding of how change happens. An Associate Professor in the Annenberg School for Communication and the School of Engineering and Applied Sciences at the University of Pennsylvania, he is Director of the Network Dynamics Group. His work has been published across disciplines in the world's leading journals and popular news outlets, like *The New York Times*, *The Washington Post*, *The Wall Street Journal*, and *The Atlantic*. His speaking and consulting clients include Amazon, Microsoft, Apple, Cigna, the U.S. Army and the NBA; his research has been funded by the Robert Wood Johnson Foundation, the National Science Foundation, the National Institutes of Health, the James S. THE RITUAL EFFECT:

The Odd (and Highly Effective) Ways We Own Our Experience

by DR. MICHAEL NORTON

An investigation of the science of ritual, based on the author's original research in behavioral science and economics, demonstrating how rituals improve performance, help us achieve goals, deepen relationships, solidify our sense of purpose and more, based on the author's groundbreaking research in behavioral economics.

Professor at the Harvard Business School, Dr. Norton holds a Ph.D. in social psychology from Princeton. His research has been published in leading journals and featured in the NYT, WSJ, WaPo, HBR, and Wired. His TEDx talk, "How to Buy Happiness," has more than 4 million views. In this ground-breaking and incisive book, Norton mines decades of original research to show how our seemingly irrational, even quirky, behaviors yield rich psychological, emotional, and practical rewards and insights, by enabling us to forge "a ritual signature." Panning from our personal daily routines and habits to relationships, teams, organizations, and communities, Norton explains how shifting from a "habitual to ritual" mindset can boost our performance, add joy to our lives, and tap into our deeper purpose

LIFESPAN:

Why We Age—and Why We Don't Have To

by DAVID SINCLAIR

It's a seemingly undeniable truth that aging is inevitable. But what if everything we've been taught to believe about aging is wrong? What if we could choose our lifespan?

In this groundbreaking book, Dr. David Sinclair, leading world authority on genetics and longevity, reveals a bold new theory for why we age. As he writes: "Aging is a disease, and that disease is treatable."

This eye-opening and provocative work takes us to the frontlines of research that is pushing the boundaries on our perceived scientific limitations, revealing incredible breakthroughs—many from Dr. David Sinclair's own lab at Harvard—that demonstrate how we can slow down, or even reverse, aging. The key is activating newly discovered vitality genes, the descendants of an ancient genetic survival circuit that is both the cause of aging and the key to reversing it. Recent experiments in genetic reprogramming suggest that in the near future we may not just be able to *feel* younger, but actually *become* younger.

Through a page-turning narrative, Dr. Sinclair invites you into the process of scientific discovery and reveals the emerging technologies and simple lifestyle changes—such as intermittent fasting, cold exposure, exercising with the right intensity, and eating less meat—that have been shown to help us live younger and healthier for longer. At once a roadmap for taking charge of our own health destiny and a bold new vision for the future of humankind, *Lifespan* will forever change the way we think about why we age and what we can do about it.

- A *New York Times* bestseller
- Dr. Sinclair was named by *Time* as one of the 100 most influential people on Earth
- A *Der Spiegel* bestseller

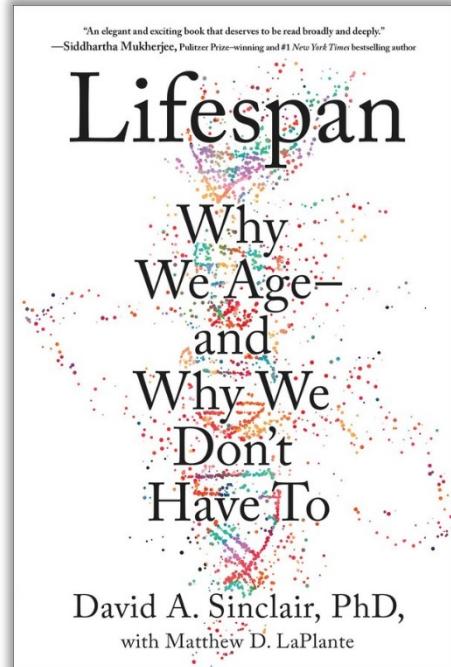

Praise for LIFESPAN:

"LIFESPAN is entertaining and fast-paced – a whirlwind tour of the recent past and a near future that will see 90 become the new 70." *Nature*

"In this insightful and provocative book that asks questions about how we age, and whether humans can overcome decay and degeneration, Sinclair grapples with some of the most fundamental questions around the science of aging. The result is an elegant and exciting book that deserves to be read broadly and deeply."

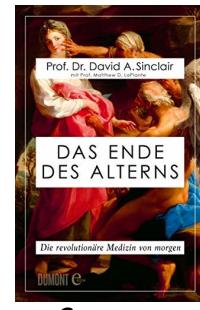

—Siddhartha Mukherjee. Author of Pulitzer Prize winning *The Emperor of All Maladies*

Dr. David Sinclair is professor of genetics at Harvard Medical School and Founding Director of the Paul F. Glenn Center for the Biological Mechanisms of Aging at Harvard. Named by *Time* as one of the 100 most influential people on earth, Dr. Sinclair obtained his Ph.D. in Molecular Genetics at the University of New South Wales and worked as a postdoctoral researcher at MIT with Dr. Leonard Guarente, where he co-discovered a cause of aging for yeast and rose to prominence for his pioneering work on resveratrol and sirtuins, genes that enhance performance and health. Dr. Sinclair has published 153 papers in journals including *Science*, *Cell*, and many others; his work has been featured widely in the popular media, including *60 Minutes*, *NBC*, *NOVA*, *The New York Times*, *The Wall Street Journal*, *Newsweek*, and *Fortune*; and he has founded and co-directed nine biotechnology companies since 2005, which have attracted more than \$2 billion in investment.

WILD SOULS:

What We Owe Animals in a Humanized World by EMMA MARRIS

In the tradition of *The Soul of the Octopus* and *What a Fish Knows*, Emma Marris's **WILD SOULS** confronts some of the most urgent questions surrounding our responsibility to wild animals, and what those answers mean to their very survival.

Our relationship with the natural environment—and the animals who share that space—is undergoing a dramatic change. In light of our significant impact on nearly every inch of habitable space, either through development, climate change or human interaction, we have become unwitting stewards of even the wildest of animals. In an age where Fiona the Hippo can be a social media star and a grieving Orca in Puget Sound can capture significant media attention, animals—wild and domesticated—have become interwoven into our existence to an astonishing degree. Marris will explore the different sides of these human/animal conflicts through in-depth reporting into specific examples from around the globe before finally leaving the reader with the framework of how to answer his or her own questions about what it means to share our planet. Is hunting acceptable? Should an “invasive” species be killed? When is genetically modifying an entire species acceptable? What about providing veterinary care? Recent scientific research is proving that animals are smarter than we ever imagined, with some species even possessing the potential for complex emotions and social lives. And Emma Marris will help define and answer the complex questions that come with a radical shift in our long-held beliefs.

Marris is an award-winning journalist based in Oregon. She writes for *The Atlantic*, *The New York Times*, *National Geographic* and *Outside Magazine*, among many others. Her work has appeared in the “Best America Science Writing 2016” and won an award from the National Association of Science Writers for an essay about wilderness in *Orion*. She is best known for her previous book, *Rambunctious Garden* (Bloomsbury, 2011) and subsequent TED Talk urging the importance of letting children experience the outdoors.

GOOD MORNING, I LOVE YOU

Mindfulness and Self-Compassion Practices to Rewire Your Brain for Calm, Clarity, and Joy

by Dr. Shauna Shapiro

Learn how self-compassion can change *everything* about how you feel, how you relate, and how you live—for good.

Many of us yearn to feel a greater sense of inner calm, ease, joy, and purpose. We have tried meditation and found it too difficult. We judge ourselves for being no good at emptying our minds (as if one ever could) or compare ourselves with yogis who seem to have it all together. We live in a steady state of “not good enough.” It does not have to be this way.

In **GOOD MORNING, I LOVE YOU**, Dr. Shauna Shapiro brings alive the brain science behind why we feel the way we do—about ourselves, each other, and the world—and explains why we get stuck in thinking that doesn’t serve us. It turns out that we are hardwired to be self-critical and negative! And this negativity is constantly undermining our experience of life.

“It is never too late to rewire your brain for positivity—for calm, clarity, and joy,” writes Dr. Shapiro. “I know this is possible because I experienced it. Best of all, you can begin wherever you are.” In short, lively chapters laced with science, wisdom, and story, Shapiro, one of the leading scientists studying the effects of mindfulness on the brain, shows us that acting with kindness and compassion toward ourselves is the key.

With her roadmap to guide you, including her signature “good morning, I love you” practice, in which you deliberately greet yourself each day with these simple words, you can change your brain’s circuitry and steady yourself in feelings of deep calm, clarity, and joy. For good.

Praise for **GOOD MORNING, I LOVE YOU**:

“A beautifully written, inspiring, yet highly practical book on how to cultivate mindfulness and self-compassion. Equal parts wisdom, science, and personal story, it will surely transform the lives of those who read it.”

—Kristin Neff, PhD, co-author of *The Mindful Self-Compassion Workbook*

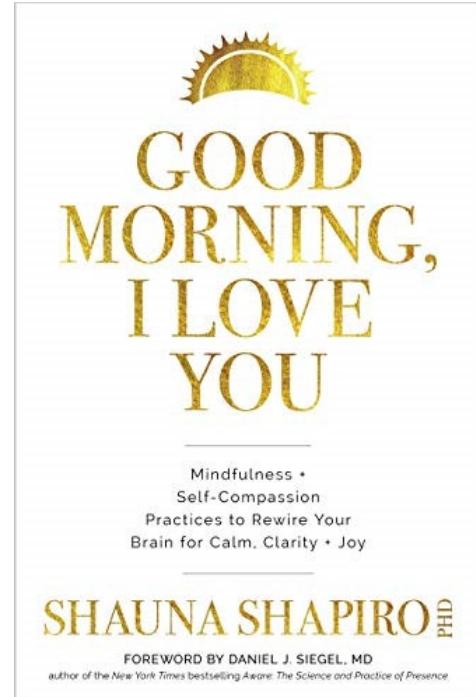

“Shauna Shapiro offers us the gift of a well-proven path to peace and joy in our lives.”
—Daniel Goleman, author of *Emotional Intelligence*

“Dr. Shapiro is one of the most thoughtful, dedicated, and articulate scientists in the field of mindfulness and compassion. Drawing on her decades of personal practice and research, she has written a practical manual that can help you attain greater clarity, calm, and joy.”—Andrew Weil, MD, author of *Spontaneous Happiness* and *Eight Weeks to Optimum Health*

“This brilliant book offers us both the science and practice of how self-kindness is the secret sauce of fulfillment, transformation, and joy.”

HEALING SIBO: The 21-Day Diet Plan to Banish Bloat, Fix Your Gut, and Balance Your Weight By SHIVAN SARNA

An estimated 25 to 45 million people in the US alone suffer from SIBO (small intestinal bacterial overgrowth), yet they are not getting the answers they need from their doctors. Having dealt with SIBO for nearly her entire life (though she wasn't diagnosed until well into adulthood), Shivan created SIBO SOS as a one-stop online resource for people like herself. She now has over 95,000 email subscribers, and her online summits are attended by 100,000+ participants per summit. She has interviewed dozens of experts, including TV personality Dr. Partha Nandi and bestselling author Dr. Eric Zielinski, and tried every diet there is. Shivan is excited to share everything she has learned, and the diet plan she now follows as a result, because she knows it really works.

The SIBO Specific Diet can seem counterintuitive at first: high fiber foods are supposed to be good for gut health, but they are bad for SIBO because they are highly fermentable and cause bloating; grapes and oranges are fine, but apples and cherries are not (it has to do with the way the fiber and sugars react with the bacteria in your gut); and you can still have clover honey and dark chocolate, but all other fermentable sugars are off limits.

Shivan will walk the reader through every aspect of SIBO: from what it is and how you can get it (the most common cause is food poisoning, but there other, more innocuous causes—such as getting hit in the stomach with a soccer ball as a child), to how to treat it and what to do if your SIBO relapses, as it does for up to two thirds of people who receive medical treatment for SIBO.

21ST CENTURY MEDICINE: Stop Disease Before It Starts by Leroy Hood, MD, PhD and Nathan Price, PhD

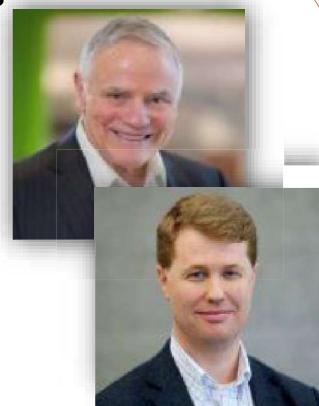

21ST CENTURY MEDICINE is an exploration of the different factors impacting our health and how personalized medicine will revolutionize our approach to health.

In the not-too-distant future, half of the population will live to the age of 100. If you want to be in that half, the tools exist today to guide you to choices that will add a decade of great health, free of chronic illness and hospital stays, to the average person's life. **21ST CENTURY MEDICINE** will show what this means for each of us, and how it should shape the choices we make today so that we can prevent disease in our own lives.

Yes, genes matter. But our genes only affect 30% of our health destiny. Our lifestyle and environment have a much bigger impact: 60%. And health care accounts for 10%. In the last century, medicine focused mainly on the 10% affected by health care. The future of medicine, however, will finally unlock the potential of the other 90% to guide us to individual choices that give us longer, healthier lives.

A seminal work in the vein of Dr. David Agus's *The End of Illness* or Dr. Michael Greger's *How Not to Die*, this book will change how we think about good health forever.

Dr. Hood is a world-renowned biologist and recipient of the 2011 National Medal of Science from President Obama. Over his 55+ year career Dr. Hood has published 850+ papers, received 37 patents, and cofounded 17 companies. He invented the automated DNA sequencing technology that enabled the Human Genome Project, one of the 20th century's landmark scientific accomplishments. **Nathan Price, PhD** is a professor at the Institute of Systems Biology and a rising star in the world of personalized medicine.

EVERYDAY TRAUMAS:

**Training the Brain to Recover from Anxiety, Depression,
and PTSD in 8 Weeks**

By DR. TRACEY SHORS

For the last 30 years, Dr. Tracey Shors has been researching the effects of stress and trauma on the brain—particularly the female brain. Her pioneering work has shed light on how we learn, how the brain generates new neurons, and how traumatic experiences—whether those experiences singularly intense and dramatic, like a car accident, or whether they are small and cumulative, like small daily harassments from a coworker—affect our ability to learn new skills and recover after we have experienced trauma. She has long been interested in the slight but impactful differences between how the male brain recovers and how the female brain recovers after trauma, and she designed some of the earliest studies into the subject.

EVERYDAY TRAUMAS shares for the first time in print her clinically tested program for stress recovery: MAP Training, a uniquely effective intervention that has been shown to reduce physiological and psychological symptoms of PTSD, stress and anxiety after just a few weeks of following the program. Dr. Shors's simple "sit, walk, sweat" program is firmly rooted in findings from her labs at Princeton and Rutgers, and has been shown to be effective with a wide range of participants, from victims of sexual trauma and women living in halfway homes, to Ivy League university students suffering from test anxiety.

Dr. Shors is a Distinguished Professor in the Department of Psychology and Center for Collaborative Neuroscience at Rutgers University. Her research has been funded by the Brain and Behavior Research Foundation, National Institutes of Mental Health and the National Science Foundation, and she has more than 130 scientific publications in outlets such as *Nature*, *Science*, *Journal of Neuroscience*, *Proceedings of the National Academy of Science*, and *Scientific American*. She previously spent six years at Princeton University as an assistant professor working on brain plasticity and sex differences in learning, and holds M.A. and PhD degrees from the University of Southern California, where she also did several years of post-doctoral laboratory work as a Research Associate in Neural, Informational, and Behavioral Sciences. MAP training has been featured on NBC Nightly News and in the *New York Times*, *Psychology Today*, *The Washington Post*, *Huffington Post*, and *Shape* magazine.

By DR. MIKE DOW

New York Times bestselling author Mike Dow offers a groundbreaking approach to activate the subconscious brain, to set yourself free from your past and create a terrific future.

Have you ever been surprised by the power of your subconscious brain? Perhaps it took control of the wheel as your conscious mind was busy tackling a problem during a 30-minute drive home. You barely remember making your way from the office, but then your car ended up safely in your driveway. Perhaps a name escaped you at some point during your day. Despite trying your hardest to remember it, the conscious parts of your brain couldn't retrieve what you were seeking. Then, your subconscious worked its magic and presented you with the answer hours later. It had been hard at work for you this whole time, and you didn't even realize it!

In **YOUR SUBCONSCIOUS BRAIN CAN CHANGE YOUR LIFE**, Dr. Mike Dow shares a program he created: subconscious-based cognitive therapy (SBCT) and the cutting-edge tools to help you learn how to speak directly to your subconscious brain and tap into your greatest strengths, gifts, and resources.
