Cerebral Entanglement

The Science Of How The Brain Creates Meaning in Our Public and Private Lives

ALLAN HAMILTON
VINTAGE, UNSCHEDULED

CEREBRAL ENTANGLEMENTS provides readers with a new, up-to-date emotional and cognitive map of our inner worlds by which we can better address the great “themes” of our personal, social, and professional lives.

We have entered a new epoch in the history of our species that has been inaugurated by a revolutionary fusion of brain imaging and neuroscience. Because of the latest brain imaging techniques, we, for the first time, are able to “see” human thought in real time, non-invasively, under normal and pathological conditions. We can identify what chemicals are in play, how they activate different regions of the brain and the resultant impact on our emotional, behavioral, and cognitive functions, and we can see what has always been missing from the equation and invisible until now: the subconscious.

Brain imaging also poses a new threat to personal privacy. Until now, the inner workings of our thought processes have been closed to the outside world and remained almost the very definition of “private;” i.e., accessible to the one and single soul from whom those thoughts originated. But now, as our thought processes and feelings can be visualized, they are available to be scrutinized and even, at times, manipulated.

The goals of this book are simple:

1. What insights does the newest information from brain imaging and supporting research give us about the most important behavioral and emotional themes in our personal lives?
2. What do these insights tell us about how these issues resonate within the larger context of society and civilization and how might it change our position or perspective on these issues?

This is not a book for brain scientists. It’s a book for individuals who want to have a better understanding of how our brain creates our needs and wants. It explores how the brain creates the agenda of our every-day lives. In each chapter the latest science is discussed and illustrated with moving human stories, in the traditions of medical writers like Oliver Sacks and Richard Selzer. With CEREBRAL ENTANGLEMENTS in our hands, we become more astute and confident navigators as we engage and explore the world – without and within –where we live, work, and play.

Burning Boy

Notes on Stephen Crane

PAUL AUSTER

HENRY HOLY, OCTOBER 2021

In this stirring biography of Stephen Crane (1871-1900), Paul Auster presents a look at the life and creative energy of the young novelist, journalist, and poet who wrote *The Red Badge of Courage* in 1895.

Crane only lived 29 years and in that time he wrote novels, short stories, poetry, and was a noted journalist. His years, 1871-1900, coincided with the growth of the American Republic, the Industrial Revolution and the beginnings of Modernism. Auster identifies with and is in awe of this young, passionate writer and that informs his prose. The biography covers the span of Crane's short life, offering a window into life in New York and London at the end of the 19th century. It is a book only Paul Auster could write about a writer and his writing.

The book will be illustrated with 20-30 photos, selections of Crane's letters, handwritten manuscript pages and original book jackets. A companion anthology of Crane's work, curated by Auster, will accompany the publication of *Burning Boy*.

BOOTSTRAP GUIDE TO BREAKING FREE FROM BULLYING

KIM JOHN PAYNE

SHAMBHALA, WINTER 2021

From the internationally bestselling author of *Simplicity Parenting*, which has sold in 16 countries, Kim John Payne, this fresh take on bullying is essential for parents and teachers to understand what their kids are up against in order to help them navigate the social landmines of their world.

The current Zero Tolerance approach employed by parents and schools to combat violent or aggressive behavior in children has proven ineffective. Dr. Payne and other parenting experts agree that this is because a Zero Tolerance approach essentially tries to bully children into not bullying. Zero tolerance means zero room for growth.

The *Bootstrap Guide To Breaking Free from Bullying* is the antidote to our failing efforts to fix childhood aggression. Dr. Payne has created a new, individual child-based approach to deal with exclusion cultures at school, in sports, and at home, through a combination of peer mentoring and practiced parental guidance based on the very practical philosophy that “you can’t control what comes at you in life, but you absolutely can control where and how you meet it.”

Dr. Payne has compiled a series of “lessons” that empower the targeted child and his or her parent(s) to break the bullying cycle. These lessons, co-written by author/journalist Luis Fernando Llosa, are based in thirty years of field research conducted by Dr. Payne, whose social inclusion programs have been implemented in thousands of schools worldwide. In addition to lessons, Dr. Payne includes fifteen youth-narrated stories, told in the voices of conscientious big brothers and sisters—ages sixteen to eighteen—who found ways to overcome various forms of exclusion, teasing and bullying during their middle school years.

There is nothing like Dr. Payne’s approach, which has served him well in his over 20 years of teaching. He already has 1,500 Social Intervention coaches in schools trained to buy and use this book in addition to his army of *SIMPLICITY PARENTING* coaches who work with parents around the world.

The Founders

The Story of PayPal and the Entrepreneurs Who Shaped Silicon Valley

JIMMY SONI

SIMON & SCHUSTER, FEBRUARY 2022

A fascinating page-turner about the brilliant and competitive innovators who created PayPal and went on to shape our digital world. The colorful cast of characters—including Thiel, Musk, Hofman, Levchin—is amazing. Deeply reported and bracingly written, this book is an indispensable guide to modern innovation and entrepreneurship."

—Walter Isaacson, New York Times bestselling author of Code Breaker

A definitive, deeply reported look at the origin of PayPal and its founding team, including Elon Musk, Peter Thiel, Reid Hoffman, Max Levchin, and others whose stories have never before been told. They have defined the modern world. This experience defined them.

Today, PayPal's founders and earliest employees are considered the technology industry's most powerful network. Since leaving PayPal, they have formed, funded, and advised the leading companies of our era, including Tesla, Facebook, YouTube, SpaceX, Yelp, Palantir, LinkedIn, Pinterest, and Airbnb, among many others. They defined 21st-century innovation and entrepreneurship—and still shape that template today. Their names stir passions; they're as controversial as they are admired.

Yet for all their influence, the story of how they first connected and cut their start-up teeth has gone untold. Before igniting the commercial space race or jumpstarting social media's rise, they were the unknown creators of a scrappy online payment company called PayPal. It would grow to become one of the world's foremost companies, but that success was anything but certain. From the outset, the team faced industry skeptics, bruising competition, internal strife, the emergence of widespread online fraud, and the devastating dot-com bust of the 2000s.

In *The Founders: The Story of PayPal and the Entrepreneurs Who Shaped Silicon Valley*, award-winning author and biographer Jimmy Soni pulls back the curtain on PayPal's turbulent early days. With hundreds of interviews and unprecedented access to thousands of pages of internal material, Soni shows how the seeds of so much of what shapes our world today—fast-scaling digital start-ups, cashless currency concepts, mobile money transfer—were planted two decades ago. He also reveals the countless individuals whose stories never made the front pages nor earned banner headlines—but whose contributions were vital to PayPal's success.

The Founders is a story of iteration and inventiveness, one that casts a long and powerful shadow over modern life. Jimmy Soni's narrative offers deep insight into how this once-in-a-generation assemblage of talent came to work together and how that collaboration changed our world forever.

4321

PAUL AUSTER

HENRY HOLY, JANUARY 2017

Paul Auster's greatest, most heartbreaking and satisfying novel—a sweeping and surprising story of birthright and possibility, of love and of life itself: a masterpiece.

4321 was shortlisted for the Man Booker Prize for Fiction in 2017.

Nearly two weeks early, on March 3, 1947, in the maternity ward of Beth Israel Hospital in Newark, New Jersey, Archibald Isaac Ferguson, the one and only child of Rose and Stanley Ferguson, is born. From that single beginning, Ferguson's life will take four simultaneous and independent fictional paths. Four identical Fergusons made of the same DNA, four boys who are the same boy, go on to lead four parallel and entirely different lives. Family fortunes diverge. Athletic skills and sex lives and friendships and intellectual passions contrast. Each Ferguson falls under the spell of the magnificent Amy Schneiderman, yet each Amy and each Ferguson have a relationship like no other. Meanwhile, readers will take in each Ferguson's pleasures and ache from each Ferguson's pains, as the mortal plot of each Ferguson's life rushes on.

As inventive and dexterously constructed as anything Paul Auster has ever written, yet with a passion for realism and a great tenderness and fierce attachment to history and to life itself that readers have never seen from Auster before. 4 3 2 1 is a marvelous and unforgettably affecting tour de force.

Ferrari

The Man, The Car, The Races, The Machine

BROCK YATES
RANDOM HOUSE, UNSCHEDULED

Brock Yates' 1991 biography of Italian auto titan, Enzo Ferrari will be updated and published as a movie tie-in to coincide with the upcoming movie directed by Michael Mann.

To his legion of admirers, Enzo Ferrari (1898-1988) was a genius who personally created marvelous cars of advanced design. But as Car and Driver columnist Yates points out in this captivating, demythologizing biography, none of Ferrari's racing cars "was a glittering example of daring technology," and he had almost no hand in the making of the later road cars that bore his name. Revealed as a hot-tempered megalomaniac given to loud belching and countless amorous conquests, Ferrari fathered an illegitimate child and led a shadowy second life as a respite from the "simmering hatred" of his marriage. He portrayed himself as a loyal "motorized knight-errant," defending Italy's national honor, but in Yates's estimate he was interested solely in winning races and sometimes pushed his drivers to dangerous extremes. Yates deftly records the carnage of major races, business wheeling and dealing, and the political dimensions of motor racing from the pre-WWII Rome-Berlin Axis to today's ribbon-waving nationalism.

Work With Me

The 8 Blindspots Between Men and Women in Business

BARBARA ANNIS & JOHN GRAY
PALGRAVE MACMILLAN, MAY 2013

A revolutionary system from internationally recognized experts
in Gender Intelligence

International corporate consultant and gender issues expert Barbara Annis and the multi-million copy bestselling author of *MEN ARE FROM MARS, WOMEN ARE FROM VENUS* John Gray, outline a revolutionary system where gender differences promote synergy and produce rewarding careers. Already their system has grandly impacted such prominent companies as American Express, IBM, and Microsoft. It is based on the results of 20 years of in-depth surveys of over 100,000 men and women in Fortune 500 companies around the world, which will be revealed in this book for the first time, and incorporates incontrovertible scientific data and organizational studies.

John Gray has a strong international presence, with Mars/Venus coaches located throughout the world. Barbara Annis, whose clients include such multinationals as Pearson, American Express, and Microsoft, has a new contract to do 200 workshops for SAP worldwide over the next 2 years. Additional information about the authors international affiliations available upon request.

"In this must-read, Annis (an expert on workplace gender issues and chair of the women's leadership board at Harvard's Kennedy School of Government) and relationship expert Gray (author of the bestseller *Men are from Mars, Women are from Venus*) examine how and why men and women think differently at work, and what we can do about it. [...] Pragmatic and timely, this joint offering by two complementary experts—one from Mars and one from Venus—promises to be a game changer."

A Mind At Play

How Claude Shannon Invented the Information Age

JIMMY SONI AND ROB GOODMAN
SIMON & SCHUSTER, JULY 2017

"Claude Shannon wrote the 'the Magna Carta of the Information Age' and conceived of the basic concept underlying all digital computers. Jimmy Soni and Rob Goodman offer a long overdue, insightful, and humane portrait of this eccentric and towering genius." —Walter Isaacson, New York Times Bestselling author of *Steve Jobs*, *The Innovators*, and *Einstein*

Nominated for a National Book Award in 2017

Jimmy Soni and Rob Goodman present the incredible untold biography of one of the foremost intellects of the twentieth century: Claude Shannon—the neglected architect of the Information Age.

Every computer built, email sent, and webpage loaded finds its roots in the insights of Claude Shannon's technological genius. A groundbreaking polymath, a brilliant tinkerer, and a digital pioneer, Shannon is responsible for the seminal text of the digital revolution, often referred to as the "Magna Carta of the Information Age."

This elegantly written biography brings Shannon's reclusive, playful genius to life in a narrative that reaches from the age of room-sized computers to the age of Apple. It's the story of the origins of our digital world in the tunnels of MIT and the "idea factory" of Bell Labs, in the "scientists' war" with Nazi Germany, and in the work of Shannon's collaborators and rivals, thinkers like Alan Turing, John von Neumann, Vannevar Bush, and Norbert Wiener.

"A welcome and inspiring account of a largely unsung hero—unsung because, the authors suggest, he accomplished something so fundamental that it's difficult to imagine a world without it." – Kirkus Review

Telling Lies

Clues to Deceit in the Marketplace, Politics, and Marriage

PAUL EKMAN

W.W. NORTON & COMPANY, JANUARY 2009

The science behind the hit television series Lie to Me™

From breaking the law to breaking a promise, how do people lie and how can they be caught? *Telling Lies* describes how lies vary in form and how they can differ from other types of misinformation that can reveal untruths. It discusses how a person's body language, voice, and facial expressions can give away a lie but still fool professional lie hunters ... even judges, police officers, drug enforcement agents, and Secret Service agents. In this revised edition, Paul Ekman, a renowned expert in emotions research and nonverbal communication, adds a new chapter to present his latest research on his groundbreaking inquiry into lying and the methods for uncovering lies. Ekman has figured out the most important behavioral clues to deceit and he has done research that identifies the facial expressions that show whether someone is likely to become violent.

Paul Ekman, director of Paul Ekman Group, is the author of *Emotions Revealed*, *Emotional Awareness* (coauthored with the Dalai Lama), *Why Kids Lie* and eleven other books. The FOX series *Lie to Me* is based on his research. A professor emeritus at the University of California, San Francisco, he lives in the Bay area.

"Ekman [is] a pioneer in emotions research and nonverbal communication. . . . Accurate, intelligent, informative, and thoughtful." —New York Times Book Review

"[A] wealth of detailed, practical information about lying and lie detection and a penetrating analysis of ethical implications." —Jerome D. Frank, The John Hopkins School of Medicine

SIMPLICITY PARENTING

Using the Extraordinary Power of Less to Raise Calmer, Happier, & More Secure Kids

KIM JOHN PAYNE
BALLANTINE, AUGUST 2010

Kim travels to speak to 10,000 to 20,000 people a year.

Today's busier, faster society is waging an undeclared war on childhood. With too much stuff, too many choices, and too little time, children can become anxious, have trouble with friends and school, or even be diagnosed with behavioral problems. Now internationally renowned family consultant Kim John Payne helps parents reclaim for their children the space and freedom that all kids need for their attention to deepen and their individuality to flourish. Simplicity Parenting offers inspiration, ideas, and a blueprint for change.

The Simplicity Parenting movement has been growing steadily over the last few years and there are now group leaders in the following countries: Hungary, Spain, Germany, UK, Greece, Turkey, Sweden, France, Czech Republic, Japan, China, Taiwan, Indonesia, Philippines, Australia, Israel, Russia, and Brazil. Each year, Dr. Payne's network of Simplicity Parenting coaches grows, with each coach using this book as required reading for their classes and programs.

In celebration of the Simplicity Parenting's ten year anniversary, Dr. Payne has revised his bestselling book with a focus on the fast-moving issue of screen use for children.

Kim John Payne was born in Australia where he began his training in social services by working closely with street gangs in group homes. He later traveled to border camps in Jakarta and Thailand to work with refugees. Payne was a school counselor for 18 years and ran a private family practice for 15. He is a consultant and trainer to over 60 independent and public schools throughout the United States and has consulted for the South African Schools Federation, the Hungarian Ministry of Education, and educational associations in Israel, Russia, Australia, and the United Kingdom.

PERCEPTION: HOW OUR BODIES SHAPE OUR MIND

DR. DENNIS PROFFITT AND DRAKE BAER

ST. MARTIN'S PRESS, JULY 2020

Over decades of study, University of Virginia psychologist Dennis Proffitt has shown that we are each living our own personal version of Gulliver's Travels, where the size and shape of the things we see are scaled to the size of our bodies, and our ability to interact with them. Stairs look less steep as dieters lose weight, baseballs grow bigger the better players hit, hills look less daunting if you're standing next to a close friend, and learning happens faster when you can talk with your hands.

Written with journalist Drake Baer, Perception marries academic rigor with mainstream accessibility. The research presented and the personalities profiled will show what it means to not only have, but be, your unique human body. The positive ramifications of viewing ourselves from this embodied perspective include greater athletic, academic, and professional achievement, more nourishing relationships, and greater personal well-being. The better we can understand what our bodies are—what they excel at, what they need, what they must avoid—the better we can live our lives.

ONE DEGREE REVOLUTION: SMALL SHIFTS, BIG CHANGES

BY COBY KOZLOWSKI

ST. MARTIN'S PRESS, JANUARY 2020

From a thought leader in the movement for inspired living and the exciting field of transformative leadership, One Degree Revolution is a holistic program for self-inquiry and creating personal change that springs from living yoga, not just doing downward dog or the ascetic monk's transcendental search. Living yoga teaches us how to discover what's real and true, to celebrate, live in wonder, and ride the waves of life with grace. Yoga's philosophy is infused with the author's strategies for skillfully and fully participating with the movement of life to manifest our deepest desires and have a positive impact on the world. Coby shows readers how to dig deep and ask the right questions at the right time to access and open infinite personal possibilities, unveil a true sense of purpose and foster change.

WHAT'S UP BEANIE

BY ALINA TYSOE

HOUGHTON MIFFLIN HARCOURT, AUGUST 2021

A collection of 160 comics from the hugely popular What's Up, Beanie?, all adorable, humorously frank, completely wholesome, and acutely relatable

Hilariously eccentric and self-aware, Alina Tysoe, the pink-haired illustrator behind the wildly popular What's Up, Beanie?, captures relatable topics like family, the awkward pains of social anxiety, sweet moments of love and a growing relationship, amusing childhood stories, and her intense love of dogs. Adorably drawn, these endearing snapshots of Alina's life are surprisingly familiar, as if they've been taken from your own life: finding solace with a lone puppy at a crowded party, the frustration of deciding what to eat for dinner, making the mistake of hitting the snooze button, accidentally stepping on a dog's foot and feeling like a MONSTER, and tons more!

TALKING TO STRANGERS: SELECTED ESSAYS, PREFACES, AND OTHER WRITINGS 1967-2017

PAUL AUSTER
HOLT, MAY 2019

"Every novel is an equal collaboration between the writer and the reader, and it is the only place in the world where two strangers can meet on terms of absolute intimacy. I have spent my life in conversations with people I have never seen, with people I will never know, and I hope to continue until the day I stop breathing. It is the only job I've ever wanted." Those are the words with which Paul Auster concluded his 2006 Prince of Asturias Prize for Literature acceptance speech.

Now, more than ten years later, they serve as the inspiration for the title of his latest project, TALKING TO STRANGERS: Selected Essays, Prefaces, and Other Writings. This is the legacy volume chosen by Paul Auster to represent the best of his collected nonfiction over the past 40 years including speeches, op-eds, prefaces, and essays from 1967-2017.

ROUGE

BY RICHARD KIRSCHENBAUM
ST. MARTIN'S PRESS, JUNE 2019

ROUGE is a sexy, glamorous journey into the rivalry of the pioneers of powder, mascara and rouge. This fast-paced novel examines the lives, loves, and sacrifices of the visionaries who invented the modern cosmetics industry: Josiah Herzenstein, born in a Polish Jewish Shtetl, the entrepreneur who transforms herself into a global style icon and the richest woman in the world, Josephine Herz; Constance Gardiner, her rival, the ultimate society woman who invents the door-to-door business and its female workforce but whose deepest secret threatens everything; CeeCee Lopez, the bi-racial beauty and founder of the first African American woman's hair relaxer business, who overcomes prejudice and heartbreak to become her community's first female millionaire. The cast of characters is rounded out by Mickey Heron, a dashing, sexy ladies' man whose cosmetics business is founded in a Hollywood brothel.

Sony Pictures has acquired film rights to ROUGE for production by Academy Award winning producer, Wendy Finerman, known for turning such books as "Forrest Gump" and "The Devil Wears Prada" into blockbuster movies. The film will feature A-list stars, still yet to be cast.

GOOD NEIGHBORS, BAD TIMES REVISITED: NEW ECHOES OF MY FATHER'S GERMAN VILLAGE

BY MIMI SCHWARTZ
UNIVERSITY OF NEBRASKA PRESS, MARCH 2021

Mimi Schwartz's father was born Jewish in a tiny German village thirty years before the advent of Hitler when, as he'd tell her, "We all got along." In her original memoir, Good Neighbors, Bad Times, Schwartz explored how human decency fared among Christian and Jewish neighbors before, during, and after Nazi times. Ten years after its publication, a letter arrived from a man named Max Sayer in South Australia. Sayer, it turns out, grew up Catholic in the village during the Third Reich and in 1937 moved into an abandoned Jewish home five houses away from where the family of Schwartz's father had lived for generations before fleeing to America a few months earlier. The two families had never met.

Sayer wrote an unpublished memoir about his childhood memories and in Schwartz's new edition, Good Neighbors, Bad Times Revisited, the two memoirs talk to each other. Weaving excerpts from Sayer's memoir and from a yearlong correspondence with him into her book, Schwartz revisits village history from a new perspective, deepening our understanding of decency and demonization. Given the rise of xenophobia, white supremacy, and anti-Semitism in the world today, this exploration seems more urgent than ever.
