## Over on a Mountain

*A High-Altitude Baby Animal Counting Book*

Marianne Berkes, illustrated by Jill Dubin

*Our World, Our Home*

MARIANNE BERKES has spent much of her life with children as a teacher, children's theater director, and children's librarian. Marianne is the author of twenty (and counting!) published picture books for children. Marianne especially enjoys writing books about animals and nature. She hopes to open kids' eyes to the magic found in our natural world. Many of her books align to Common Core Standards since they are science, math, and art related.

Learning becomes fun with this book about the ecosystem on a mountain. Sung to the tune of "Over in the Meadow," this informative and fun rhyming format and amazing artwork will inspire children in classrooms and at home to appreciate the world around us!

- A longtime bestseller for Dawn, it speaks to both a child's heart and mind

Discover twenty cool animals, ten great mountain ranges, and seven continents all in one story! And do it in the age-old style of children the world over—by clapping, counting, singing, and acting like...well, animals! What fun! Following the main story, this book is chock-full of resources for parents and teachers, including facts about each of the animals featured (including the hidden animals) and about mountains. A simple world map makes it easy for children to locate the continents and the mountain ranges where the animals live. A "Tips from the Author" page has suggested activities and a "Tips from the Illustrator" page offers an interesting perspective from the artist, who created the illustrations using cut paper.

## Over on a Desert

*Count the Baby Animals That Live in the Driest Places*

Marianne Berkes, illustrated by Jill Dubin

*Our World, Our Home*

MARIANNE BERKES has spent much of her life with children as a teacher, children's theater director, and children's librarian. She hopes to open kids' eyes to the magic found in our natural world. Many of her books align to Common Core Standards since they are science, math, and art related.

Learning becomes fun with this book about the ecosystem on a desert. Sung to the tune of "Over in the Meadow," this informative and fun rhyming format and amazing artwork will inspire children in classrooms and at home to appreciate the world around us!

- A counting element and vibrant art grabs readers' interest, helping them learn the science content

Deserts are full of surprises! An amazing array of animals calls this driest place on Earth their home. Through rhythm and rhyme, children meet a new animal on every page. They won't be able to resist getting in on all the action as animal parents teach their babies how to live in this unusual place—camels kneel, armadillos dig, dingoes sniff, and jerboas jump. Cut-paper collages capture the subtle beauty of the desert and also "hide" more animals for young eyes to find. Additional information, a world map, and tips from the author give parents and teachers all they need to make learning fun. One part song, one part story, and one part sheer delight!

Their GRAMMY-nominated albums, multimedia, and curricula empower youth to embody change, advocate for others, and imagine a world they can both be seen in and thrive in. Alphabet Rockers are based in Oakland, California, on the unceded land of the Chochoeny Ohlone people.

*When I say something is unfair to me, but it's fair for you, what does that make it?  
When I meditate, it all gets clear.  
And if you listen, you will really hear.  
I am not alone. I am enough.*

It can be scary to feel like you're all on your own, especially in the face of prejudice. But always remember: you are not alone. Inspired by the Alphabet Rockers' empowering song "Not Alone," this uplifting picture book reassures kids that they belong and encourages them to love their beautiful selves and their identities, use their voices against hate, and step up for one another and have one another's backs no matter what.

# This Book Is Banned

Raj Haldar, illustrated by Julia Patton

From *New York Times* bestselling author Raj Haldar. A self-referential, “meta” picture book about a book that itself has been banned, illuminating the dangers of curtailing free speech, censoring ideas, and banning books in a way that children can understand.

- **Bestselling author:** Raj Haldar is the #1 *New York Times* bestselling author of *P Is for Pterodactyl*. Hot topic: Book banning has been in the news more than ever with many new book bans happening daily
- **Funny and educational:** The approach is impartial and simple enough that readers can get an understanding that you can't please all the people all the time

*THIS BOOK IS BANNED!*  
PLEASE DON'T EVEN TRY TO READ IT. IF YOU DO,  
YOU'LL FIND OUT WHY WE DON'T WANT ANYONE  
TO KNOW WHAT HAPPENS AT THE END...

With each new page, we can see characters being erased from the page, cut out, and taped over. It's like if Harold had been given an eraser instead of his purple crayon. Using a literary device not unlike the classic *Sesame Street* title *The Monster at the End of This Book*, this book playfully discourages young readers from turning each page, even to throw the book away, while the “curiosity gap” to discover why the book has been banned heightens and leads them to the absurd surprise ending—one that underscores the importance of free speech.

Also known by his stage name, Lushlife, RAJ HALDAR is an American rapper, composer, and producer from Philadelphia, Pennsylvania. He's also the #1 *New York Times* bestselling author of *P Is for Pterodactyl*. Connect with him on *Twitter* @lushlifemedia

JULIA PATTON is an award-winning author and illustrator who has published more than twenty-five children's books across the world, including *Unstoppable Max*, *The Curious Tale of Fi-Rex*, *From Apple Trees to Cider, Please!*, and the forthcoming *Drat That Fat Cat!* She lives in Northumberland, UK, with her husband and sons.

## I Like This Color!

# Listen to the Language of the Trees

*A Story of How Forests Communicate Underground*

Tera Kelley, illustrated by Marie Hermansson

TERA KELLEY was a children’s bookseller for six years, and her first book, *Ocean Baby*, was selected for the ocean curriculum of Santa Cruz’s Migrant Head Start Program. She is currently a freelance writer and editor in Northern California, where she works at a local library. Find out more about her work at [terakelley.com](http://terakelley.com).

This fascinating picture book explores the underground communication system between trees and helps young readers see that the natural world’s survival depends on staying connected and helping others—just like us!

- Explores a fascinating, trending topic: Reveals the underground communication system of tree roots in a forest to young readers, a fairly new revelation in the scientific world
- Perfectly aligns with science and literacy curriculum: The story and backmatter explore the forest ecosystem, the underground mycorrhizal network, and symbiotic relationships in nature, in alignment with K-5 Next Generation Science Standards
- Practical uses for teachers: Backmatter includes activities for social-emotional learning and the universal connection of all living things to expand on the concepts introduced in the story

Readers will discover that trees have their own social network, and helping one another thrive is trending.

The fascinating mycorrhizal fungi network runs underground through the forest via the roots of trees, allowing for connection and communication.

*Listen to the Language of the Trees* captures the magic of talking trees that take care of their neighbors (not to mention the mysterious fungi that help them do it).

A lyrical read-aloud, *Listen to the Language of the Trees* is the story of a seedling, newly sprouted at the base of a giant tree. As it stretches its roots into an underground web of fungi, it learns that its fellow trees use the fungi to pass messages and share resources! It will take great luck for this tiny seedling to survive, but it will have help from its friends in the forest. The Douglas fir forest also harbors creatures like a zany Yellow Pine chipmunk gathering and forgetting seed cones, an owl nested in the giant tree, and chattering Steller’s jays. And, as we must never forget, no part of the forest is entirely free from danger!

# The Girl Who Heard the Music

*How One Pianist and 85,000 Bottles and Cans Brought New Hope to an Island*

Mahani Teave and Marni Fogelson, illustrated by Marta Álvarez Miguéns

When one young woman recycled 24 tons of ocean trash to create the very first school of music on Easter Island, she proved that anyone can make a difference! Fans of *Shark Lady* will appreciate this incredible feminist story that empowers kids to use their passions to change the world!

- **Inspiring feminist biography:** Mahani Teave is renowned for both her music and her humanitarian efforts and has been featured in the *New York Times*, *NPR*, the *BBC*, *CBS Sunday Morning*, and the 2020 documentary *The Song of Rapa Nui*
- **Celebration of Polynesian culture:** Mahani is an iconic activist from the Pacific Islands, and this gorgeously illustrated picture book embraces her culture and background
- **Focus on eco-justice:** Kids are more concerned about the environment than ever, and *The Girl Who Heard the Music* brings awareness to ecological matters like sustainability issues and ocean plastic—along with innovative, kid-powered solutions to these problems

**MAHANI TEAVE** is an award-winning concert pianist from Rapa Nui (Easter Island). Her debut album, *Rapa Nui Odyssey*, launched as number one on the Billboard Classical charts. She is one of the founders of Toki Rapa Nui, a nonprofit dedicated to the island’s ecological and cultural preservation. She lives with her family on Rapa Nui, where she leads the Rapa Nui School for Music and the Arts.

**MARNI FOGELSON** is a children’s book author, lifestyle writer, and community volunteer. She has an insatiable love for reading and believes that books have a tremendous power to make us better humans. Marni lives with her husband, two children, and a very loud and affectionate hound in Philadelphia.

**MARTA ÁLVAREZ MIGUÉNS** is a self-taught children’s illustrator. She was born in a small town in Galicia, Spain, and currently lives in La Coruña, Spain. She is the illustrator of *Shark Lady* (written by Jess Keating), which was named a 2018 Best STEM Book by the Children’s Book Council as well as a Best STEM Book by the National Science Teachers Association.

Mahani Teave grew up on Rapa Nui, also known as Easter Island, one of the most remote islands in the world. When she began taking lessons on the island’s only piano, her incredible talent led her to leave Rapa Nui when she was just nine years old to continue her music education. Although she wished she didn’t have to leave such a beautiful place to pursue her dreams, she became an internationally acclaimed classical pianist, playing around the world for all kinds of audiences.

But her island home kept calling her back. Years later, she returned to Rapa Nui to stay, and with a new dream: to save its environment and culture. Mahani saw the island’s struggles with pollution from tourism and ocean plastics and found a unique solution. She created the island’s first music and arts school so children there could learn music in ways that kept the island’s unique traditions alive—and did so through recycling! The school was built using thousands of tires, bottles, and cans in its walls, incorporating rain barrels, solar panels, and a food garden.

Because Mahani pursued her dreams, she changed the fate of the island, creating an inspiring place that celebrates the land of Rapa Nui and its people—and showing children everywhere that they can stand up for their passions too.

# Minda's Record Setting Race

Minda Dentler

MINDA DENTLER is the first female wheelchair athlete to complete the Ironman World Championship. She has been featured on *CNN* and *NBC* and was nominated for an ESPN ESPY Award for the Best Female Athlete with a Disability. She has also written for *Huffington Post* and *TIME*, promoting the eradication of polio, and has served as a global immunization advocate for Rotary International and the UN Foundation. In addition to being a mom, an athlete, and an activist, she is a motivational speaker. She shares her story with Fortune 500 companies, including Amazon and Microsoft, nonprofits, and universities, urging listeners to find their own personal Ironman.

**This uplifting picture book tells the amazing true story of Minda Dentler, the first female wheelchair athlete to complete the Ironman World Championship triathlon!**

- **True story:** An incredible and engaging true story of determination, persistence, and overcoming mental and physical obstacles to reach a goal—themes that all kids (and adults) can learn from and relate to
- **Author Minda Dentler is a great public speaker:** Minda's TED Talk has been viewed more than 1.4 million times, and she regularly tours the world for speaking events; she is incredibly excited to inspire and empower young readers with her story
- **Kids with disabilities find representation:** As we've seen with the success of *All the Way to the Top*, parents, teachers, and librarians are looking for more picture books featuring people with disabilities, and this is the perfect book to fill that need

Minda Dentler made history when she became the first female wheelchair athlete to complete the world's toughest triathlon, using only her arms to finish a 2.4 mile swim, 112 mile bike ride, and 26.2 mile marathon. But the journey there wasn't easy. Minda was paralyzed as an infant in India after contracting polio and was left in the care of an orphanage. After she was adopted by an American family and moved to Washington, she underwent surgeries to enable her to walk with leg braces and crutches.

As she grew, she faced many challenges but remained undeterred by her disability. Her decision to begin training and competing in triathlons was no different. Our stage one cards present babies with images of black-and-white fruits and vegetables that are perfect for newborns up to six months. After black and white, babies six to twelve months old begin to recognize yellow and red, and the cards in stage two feature these colors to help babies focus on their new discoveries.

And finally, older babies twelve to sixteen months can recognize blue, orange, and green, and these colors are featured in the foods, shapes, and patterns in the stage three cards that will get babies ready to continue their natural development. Our second set of SmartContrast Montessori Cards®, *Hello, My Food*, has been developed by the same creative team and artists behind our bestselling series of high-contrast books—*Hello, Baby Animals*; *Hello, Garden Bugs*; *Hello, Ocean Friends*; and *Hello, My World*—which have more than 200,000 copies in print and thousands of five-star reviews by parents who purchased online and in brick-and-mortar stores.

# The Ultimate Dictionary of All Things Digital

duopress labs, illustrated by Annika Brandow

A timely book that introduces important concepts of digital literacy to elementary-school children.

- A timely resource for the changing technological world: As kids' use of technology increases every day, so does the need to understand the new vocabulary entering their lives; while the underlying operation of a computer hasn't changed much in the past few decades, new devices, technologies, and digital terms seem to change every day
- Digital literacy is digital health and safety: Navigating new technology comes with all kinds of privacy and safety challenges: How do you stay safe on the internet? What is a reliable source? Issues like algorithm biases, cryptocurrency, deep fakes, digital divide, digital citizenship, and electronic footprint are essential terms for twenty-first-century kids to understand
- A book that fills an immediate need: According to Code.org and the Computer Science Teachers Association (CSTA), the demand for computer science jobs in the United States is higher than ever, a trend reflected globally; schools are increasingly introducing coding and computational training in elementary and middle school
- This book is a perfect introduction for young readers looking for information on these subjects, and it's ideal for parents who want to start a conversation with their kids but might need a little help with the terminology

Help kids go full STEAM ahead into the digital landscape.

Computer science is an essential part of today's curriculum, starting in elementary school. Learning the basics of computing and coding boosts kids' problem solving, creativity, and critical thinking skills while teaching them a subject that has real-life applications. Kids become tech proficient easily, and their malleable minds are quick to understand how to use software and basic processes. But no matter what field they choose to go into as adults, they will have to understand the realities of the ever-changing digital world—the way it is built and maintained, and the implications on everyday life.

*The Ultimate Dictionary of All Things Digital* will combine definitions for the basics of computing and coding, as well as the big-picture issues—more complex terms that deal with safety, privacy, and abstract terminologies like algorithm bias, NFTs, the uncanny valley, and deep fakes.

Like *The Young Activist's Dictionary of Social Justice*, this book will include age-appropriate definitions that explain terms through the lens of the digital world, plus pronunciation and part of speech.

Five years ago, the melting of arctic permafrost released a pathogen of unknown origin into the atmosphere, causing a small percentage of people to undergo a transformation that became known as the Hollowing. Those impacted slowly became intolerant to normal food and were only able to gain sustenance by consuming the flesh of other human beings. Those who went without flesh quickly became feral, turning on their friends and family. However, scientists were able to create a synthetic version of human meat that would satisfy the hunger of those impacted by the Hollowing. As a result, humanity slowly began to return to normal, albeit with lasting fear and distrust for the people they'd pejoratively dubbed ghouls.

Zoey, Celeste, Valeria, and Jasmine are all ghouls living in Southern California. As a last hurrah before their graduation, they decide to attend a musical festival in the desert. They have a cooler filled with hard seltzers and syn-flesh and are ready to party.

But on the first night of the festival, Val goes feral and ends up killing and eating a boy. As other festival guests start disappearing around them, the girls soon discover someone is drugging ghouls and making them feral. And if they can't figure out how to stop it, and soon, no one at the festival is safe.

# Monsters Born and Made

Tanvi Berwah

TANVI BERWAH is a South Asian writer who grew up wanting to touch the stars and reach back in time. She graduated from the University of Delhi with a bachelor's and master's in literature of English and lives in India. *Monsters Born and Made* is her debut novel.

**She grew up battling the monsters that live in the black seas, but it couldn't prepare her to face the cunning cruelty of the ruling elite.**

- **Fantastic writing:** Absolutely fantastic writing with incredible pacing and worldbuilding that transports you into this lush South Asian-inspired setting
- **Tropes that YA readers love:** Classic fantasy tropes feel fresh, interesting, and perfect for the teen fantasy audience
- **Well-connected author:** Melissa Albert had this to say about a previous short story: "A mesmerizing account of love, loss, and revenge, entwined with a mythic family history. It's all spikes and rising oddity, a sharp-toothed thing that nods to Helen Oyeyemi and Kelly Link, but does its own thing."

Sixteen-year-old Koral and her older brother, Emrik, risk their lives each day to capture the monstrous maristags that live in the black seas around their island. They have to, or else their family will starve.

In an oceanic world swarming with vicious beasts, the Landers, the ruling elite, have indentured Koral's family to provide the maristags for the Glory Race, a deadly chariot tournament reserved for the upper class. The winning contender receives gold and glory. The others—if they're lucky—survive.

When the last maristag of the year escapes and Koral has no new maristag to sell, her family's financial situation takes a turn for the worse and they can't afford medicine for her chronically ill little sister. Koral's only choice is to do what no one in the world has ever dared: cheat her way into the Glory Race.

But every step of the way is unpredictable as Koral races against contenders who have trained for this their whole lives and who have no intention of letting a low-caste girl steal their glory. When riots break out and rogues attack Koral to try to force her to drop out, she must choose—her life or her sister's—before the whole island burns.

Now hopeless, she is offered a deal: in exchange for the erasure of her debts, she must join and protect a hunting party for a rescue mission deep beneath the island.

Krescent is forced to play nice as the group's bodyguard, but as they venture deeper underground, she can't ignore the claustrophobia or the terrifying truth that she is trapped with her childhood enemy and a company of people who would gladly kill her if they knew who her parents were. She is determined to keep her head down and fulfill her duty, but when the group is attacked by a creature unlike anything any of them has seen, Krescent is forced to fight it and realizes that they're in real danger.

As they head down beyond where their maps end, Krescent realizes this is not a rescue mission at all, and when they are abandoned by collector's men, they are left alone with the dark and the monsters.

**A coming-of-age story about revolution, identity, and dismantling systematic oppression, perfect for fans of *The Grace Year* and *The Handmaid's Tale*.**

- **Dystopian with a message:** Like *The Grace Year* and *The Handmaid's Tale*, this novel dives into a near-future world where women are oppressed
- **Blue ocean opportunity:** There aren't that many new dystopian books out there, and we have a chance to really capitalize on an under served genre
- **Author message:** "I wanted to write a young adult novel that serves both as a warning about these potential threats—especially to the rights of women and girls—and an affirmation of our collective power. Stella's journey is one of liberation, but also empowerment."

In New America, where adolescent girls are not allowed to go out in public alone, there are three rules to remember:

*Embrace purity*  
*Navigate the World with care*  
*Trust your chaperone*

But when seventeen-year-old Stella's beloved chaperone dies under mysterious circumstances, her sheltered reality comes crashing down. Before Stella even has time to process Sister Helen's death, the new chaperone arrives. Sister Laura is everything Sister Helen wasn't. Irreverent. Unprofessional. She even leaves Stella alone (isn't that illegal?) and helps her attend those "Hush Hush" parties where you can do whatever you want.

Once Stella experiences real freedom—and learns the dark secrets at the heart of the chaperone program, including what really happened to Sister Helen—she has no choice but to fight back against the world she knows, embarking on a harrowing journey across what was once the United States and putting both her life and freedom at risk.

She and her younger sister, Hope, are convinced they know who the real killer is. They live by a strict set of rules designed to keep them safe—which is why it's such a shock when Hope is taken. Desperate to get her back, Abby tells the police everything she knows...but they refuse to do anything. They claim their hands are tied.

With every hour precious, Abby and her friends begin a desperate game of cat and mouse with the man they swear is behind the terrifying urban legend. They have to get Hope back. Quickly. # The Girl Who Never Made Mistakes

Mark Pett and Gary Rubinstein, illustrated by Mark Pett

*The Girl Who Never Made Mistakes* is the incredibly funny and inspirational result about a girl who prides herself on being perfect—until she's not.

- Stephanie Oppenheim of the *Today* show has given an early rave review: "It's great fun and certainly would be an Oppenheim Toy Portfolio winner"
- An empowering message for today's highly pressured kids
- Perfect for the school and library market, which the author is tapped into

Writer and illustrator MARK PETT lives in Mississippi with his wife, two children, and a very old dog named Catfish. Every February, the family draws five random digits from a hat and travels to whatever zip code it makes. He has illustrated several books and is the creator of the syndicated comic strips *Mr. Lowe* and *Lucky Cow*.

GARY RUBINSTEIN teaches high school math by day and is occasionally a comedian by night. In addition to co-authoring this book, he has written two guidebooks for new teachers. He lives in New York City with his wife, Erica, and his daughter, Sarah.

Meet Beatrice Bottomwell: a nine-year-old girl who has never (not once!) made a mistake. She never forgets her math homework, she never wears mismatched socks, and she ALWAYS wins the yearly talent show at school. In fact, Beatrice holds the record of perfection in her hometown, where she is known as *the girl who never makes mistakes*. Life for Beatrice is sailing along pretty smoothly until she does the unthinkable—she makes her first mistake. And in a very public way!

# Shark Lady

*The True Story of How Eugenie Clark Became the Ocean's Most Fearless Scientist*  
 Jess Keating, illustrated by Marta Álvarez Miguéns

A beautifully illustrated biography of Eugenie Clark, a scientist as impressive as the sharks she studied.

- With a heartfelt narrative in the vein of *Me...Jane* by Patrick McDonnell and *The Noisy Paintbox* by Barb Rosenstock, Jess Keating brings Eugenie Clark's world of sharks to life
- Back matter includes additional facts about sharks and Eugenie's scientific discoveries, which is perfect for educators
- Eugenie faced prejudice as a female scientist in the mid-twentieth century, and her achievements despite those obstacles will inspire children to follow their dreams

As an author and zoologist, JESS KEATING has tickled a shark, lost a staring contest against an octopus, and been a victim to the dreaded paper cut. She lives in Ontario, Canada, where she spends most of her time writing books for adventurous and funny kids. Visit her online at [jesskeating.com](http://jesskeating.com) or [@Jess\\_Keating](https://twitter.com/Jess_Keating) on Twitter.

MARTA ÁLVAREZ MIGUÉNS is a self-taught children's illustrator. She was born in a small town in Galicia, and she currently lives in A Coruña (Spain). She has worked for several Spanish and international publishers, illustrating education books and picture books. Her artwork was exhibited in the international Biennial Illustration of Bratislava in 2007, and she is a member of the Galician Illustrators Association (AGPI).

At nine years old, Eugenie Clark developed an unexpected passion for sharks after a visit to the Battery Park Aquarium in New York City. At the time, sharks were seen as mindless killing machines, but Eugenie knew better and set out to prove it. Despite many obstacles in her path, including trying to break into the scientific field as a woman, Eugenie was able to study the creatures she loved so much. From her many discoveries to the shark-related myths she dispelled, Eugenie's wide scientific contributions led to the well-earned nickname Shark Lady, as she became a fixture in the world of ocean conservation and shark research.
